

Jan M. Marte

Walford, IA | (319) 536-4244 | janmmarte16@gmail.com
github.com/JanMarte | jan-portfolio.base44.app | linkedin.com/in/janmmarte

Full-stack developer specializing in web applications and business automation, seeking software development, software sales representative, junior tester or entry-level opportunities.

EDUCATION

A.A.S. (In Progress) | Computer Software Development & Web Application Development

Kirkwood Community College, Cedar Rapids, IA

Expected May 2027

Certifications: Java Programming, .NET Programming (2026); Full Stack Developer (2027)

Gilman Scholar: (Study Abroad – Singapore): Selected for a highly competitive, two-week intensive-program focusing on AI & Project Management.

June 2026

TECHNICAL SKILLS

Languages & Frameworks: Java, C# (.NET, ASP.NET Core MVC), JavaScript, Python, HTML5, CSS3, React.js, TypeScript, Spring Boot, Vite, Bootstrap 5, Entity Framework Core and Tailwind CSS.

Databases & Integrations: PostgreSQL, Supabase, MySQL, T-SQL, ADO.NET, JDBC, RESTful API Design, Enterprise SaaS APIs (Stripe, Twilio), and Data Aggregation APIs (MLB Stats, OpenWeatherMap, PropOdds, RapidAPI, and Google Search API).

AI & Platforms: Predictive Modeling & Algorithms (Monte Carlo, NumPy, Numba), Web SaaS Architecture, Cross-Platform Mobile (.Net MAUI), Azure Container Apps, Docker, GitHub Actions (CI/CD), and Vercel.

Tools & Other: Visual Studio, IntelliJ IDEA, VS Code, Unit Testing, Git, GitHub (Projects), CI/CD Automation, Azure, Postman, Cloudflare Turnstile, Data Analysis, Windows Batch Scripting, and Agile/Scrum.

Personality Traits: Bilingual (Spanish/English), Personable, Communicative, and a Team-Collaborator.

EXPERIENCE

IT Support Specialist | Amana Society, Inc. | Amana, IA

March 2023 - 2025

- Provided responsive IT support and troubleshooting for hardware and software issues to ensure smooth daily operations across the organization.
- Leveraged strong interpersonal skills to translate technical problems and solutions effectively for non-technical and technical staff.
- Transitioned to a part-time role to successfully balance professional IT responsibilities while pursuing a software development degree.

HONORS & RECOGNITION

Eagle Leadership Program - (Bronze Level Award) | Kirkwood Community College

2024 - 2025

Recognized for active engagement and consistent participation in diverse educational, cultural, and community-building events across campus.

Dean's List | Kirkwood Community College

2024 - 2025

Recognized for outstanding academic achievement and maintaining a high GPA throughout the academic year.

PROJECTS

Universal Repair Tickets | (MVP) | React 18, Tailwind CSS, Supabase, PostgreSQL, Cloudflare Turnstile

2024–Present

- Architected a multi-tenant SaaS repair platform for a local business in Des Moines. Digitizing their current workflows with dynamic Kanban boards, custom UI routing, and automated SMS/Email client communications.
- Engineered a global white-labeling engine and extensive Admin Control Center to manage financials, auto-assignment workflows, and data enforcement.
- Implemented Supabase Row Level Security (RLS) and strict React role-based access control (RBAC) to prevent privilege escalation across Admin, Manager, and Customer portals.

Wedding Venue POS System | (MVP) | React, Vite, Supabase, PostgreSQL, Custom CSS

2025–Present

- Developed a comprehensive Point-of-Sale application handling live session timers, dynamic tax calculations, and split-check capabilities to automate workflows and save hours for a local wedding venue.
- Architected dynamic, database-driven category engines and custom React UI modals, managing complex local state and synchronization with Supabase.
- Refactored monolithic legacy CSS architectures into scoped variables (e.g., ui-kits.css), successfully resolving Vite PostCSS build errors and improving styling maintainability.

Beverage API SaaS | *(MVP) | Java, Spring Boot, React, Tailwind CSS, Supabase, Stripe API* 2025–Present

- Engineered a decoupled full-stack SaaS platform utilizing a Java backend and React/Tailwind frontend to deliver a monetized, secure recipe platform.
- Integrated the Stripe Java SDK for subscription checkout sessions and built a resilient webhook listener to asynchronously manage database tier updates.
- Implemented stateless JWT authentication and dynamic API paywalls, resolving complex 403 Forbidden role errors by rigorously testing and validating Admin versus standard user profiles.

Timber & Tools E-Commerce | *C#, ASP.NET Core MVC, Entity Framework, Supabase, Bootstrap 5* 2025–Present

- Developed a localized multi-tenant e-commerce marketplace featuring direct lumber sales, dynamic digital storefronts, and a real-time threaded messaging engine utilizing C# and Supabase.
- Built a highly performant, GPU-accelerated dynamic theme system utilizing pure CSS and custom Bootstrap variables to manage “glassmorphism” UI elements.
- Designed an Admin Command Center featuring real-time analytics, user moderation tools, and global platform economic configurations.

GOAT Coach Predictive Engine | *Python, .NET MAUI, NumPy, Supabase, REST APIs* 2026–Present

- Engineered a high-frequency predictive engine processing a 60+ feature Monte Carlo simulation to identify real-time market inefficiencies in sports data.
- Optimized processing latency to sub-200 milliseconds by compiling Python to machine code via Numba and vectorizing matrix math with NumPy.
- Aggregated and synchronized live multi-source data utilizing free-tier MLB Stats, OpenWeatherMap, and sports APIs for rigorous data validation, distributed to a C# mobile frontend via WebSocket's.

Java Application Development | *Java SE, Java EE, Java Servlets, JSP, JDBC, Docker, Microsoft Azure* 2023–Present

- Designed, coded, and tested object-oriented Java applications across three courses (Java I, II, III), progressing from core OOP principles through web-based Java and cloud deployment.
- Developed Java web applications using Java Servlets and JSP; containerized applications with Docker and deployed to Microsoft Azure cloud infrastructure.
- Produced UML Class Diagrams, Activity Diagrams, and User Stories for each project phase.

.NET / C# Application Development | *C#, ASP.NET Core MVC, Visual Studio, T-SQL, SQL Server* 2023–Present

- Designed, coded, and unit-tested C# applications across three courses (.NET Development I, II, III) using Visual Studio 2022, progressing from console apps to full ASP.NET Core MVC web applications.
- Developed data-driven web applications integrating T-SQL stored procedures, parameterized queries, and SQL Server relational database back-ends.
- Authored User Stories, MVP Stories, Activity Diagrams, UML Class Diagrams, and Wireframes for each project.

Relational Database Design | *MySQL, SQL, DDL/DML, Entity-Relationship Diagrams, Normalization (3NF)* 2024

- Designed and implemented normalized relational databases from business requirements through ER Diagram modeling, schema design, and full SQL DDL/DML implementation in MySQL.
- Produced comprehensive design documentation including Entity-Relationship Diagrams, data dictionaries, and normalization analysis through Third Normal Form (3NF).
